Ultra Low Dual FLip "I" BLOCK Symmetrical Core

FACTORY FINISH ---→ ---→ ---→ ---→

HOOK POTENTIAL Low (10)---→ ---→

BREAKPOINT SHAPE Smooth Arc (10) ---→

FLARE POTENTIAL Low (0) ---→ ---→

RG - AVERAGE Cover Heavy (1) ---→

COVER STOCK ---→ ---→ ---→ ---→

500 Siaair Micro Pad; Rough Buff

170	High (175)
85	Angular (100)
.055	High (.060)
3.1	Cover Heavy (10)

CFT maxxed-out Solid

OUT OF THE BOX CHARACTERISTICS

Skids easily through the front, saving axis rotation for the backend with a strong continuous breakpoint.

LANE CONDITIONS

best used on fresh and wet/dry lane conditions where control is needed on medium-oily to oily lane patterns.
